

Abrasives, Electro Minerals & Metals

TECHNICAL DATA

Brand Name: **Liteblast** Mac'Ants Group Ref: **LB**

Product: Maize Granules

Description: Crushed and graded maize husk

Application: For soft/light blasting where surface is not scored or distorted e.g., removal of carbon from cylinder heads as material is combustible if any remains in the cylinder afterwards. To remove surplus thin plastic from mouldings without damaging the main moulded section. Also to clean mould tools without any damage

Chemical Composition:

Compound	Chemical Formula	Typical Content %
Ligno Cellulose	--	--

Physical Parameters:

Bulk Density	TBA
Shape	Semi angular
Colour	Beige Brown
Specific Gravity	TBA
Hardness	2.5 moh

Gradation:
14/25; 24/30 and 40/100

Packaging:
Typically 20 - 25 kg multi ply paper or polythene sacks, alternative packing available on request

Compliance:
This product is exempt from a requirement to register under REACH regulation.
