

Design & Manufacture of Surface Preparation Equipment *Division*

Technical Data

Brand Name: **Compak Dry EP**
Product: Economy Pressure Cabinet

Description: Pressure cabinet systems offer an ideal equipment solution for cleaning, coating removal and especially cosmetic and decorative finishes on a wide range of materials. This compact cabinet system comes with attached high efficiency dust collector, cyclone media separator and is constructed from quality heavy gauge steel offering excellent value. It is an adaption of our popular Compak Dry Suction system which has the addition of our efficient 5 litre pressure pot under the cyclone separator.

Application: Suited to blasting with lighter density medias like Aluminas, Glass Beads and some plastic medias due to the energy generated by a suction gun assembly

Standard Features:

Feature	Present / Optional
Inbuilt Dust Collector	✓
Cyclone Media Separator	✓
Internal Rubber Lining	✓
Tungsten Carbide Lined Blast Nozzle	✓
Foot Operation & Pressure Regulator	✓
Pneumatic Semi Automatic Extractor	✓
Cleaning	✓
5 lt Pressure Pot Conversion	✓

Physical Parameters:

Overall Height	2150mm
Work Chamber Depth	600mm
Work Chamber Width	900mm
Work Chamber Height	800mm

Finish & Standards:

Heavy duty industrial paint finish to RAL 7032. All systems are CE compliant and manufactured to ISO 9000 standards

Required Services:

Single phase 13 amp supply for lighting and dust collector fan motor, compressed air with FAD 25-150 CFM upto 100 psi, subject to application

Support & Maintenance:

All our systems come with a detailed operation manual and are backed up by full service and maintenance support, contract available on request.
